

SECTION 6 DOCUMENTATION REQUIREMENT SYSTEMATICS

1 Objective

The objective of this section is to define the term documentation requirement, and to provide general requirements relating to the delivery of corresponding documents.

2 Systematics

2.1 Rights to disclose

The customer warrants that it has the necessary rights to disclose relevant documentation and information to the Society.

2.2 Documentation requirements - info codes

The info codes describes the following:

Table 1 Info codes

<i>Term</i>	<i>Info codes</i>	<i>Description</i>
For approval	AP	The corresponding documents shall be submitted for approval.
For information	FI	The corresponding documents shall be submitted for information.
For examination	EX	The corresponding documents shall be submitted for examination.
Covered by type approval	TA	The corresponding documents are normally covered by the type approval certificate.
Local handling	L	The corresponding documents will be handled by the local office of the Society.
On request	R	The corresponding documents shall be submitted on request only.
As carried out	ACO	The 'as carried out' issue of the corresponding documents shall be submitted.
Vessel specific	VS	The corresponding documents shall be submitted for each vessel.

3 Handling of documentation

3.1 General

Documentation:

- shall be submitted by the Society's customers
- shall be based on the documentation requirements given by the standards applicable to the target
- shall be handled as specified in the standard.

4 Requirements to all submitted documentation

4.1 Scope

The documentation relating to a target shall reflect all requirements that are applicable to the target, i.e. requirements given by:

- main class
- vessel type notations
- additional class notations
- international and national regulations
- other standards.

4.2 Content

4.2.1 Each document shall include, as applicable:

- target covered by the document
- for products, identification of the asset where the product will be installed (if known)
- name of company issuing the document
- name and signature of originator and verifier
- document number
- document title
- issue date
- measurement units used
- revision number
- scale.

4.2.2 The English language shall be used in the documentation, as well as in correspondence between customers and the Society. The possibility of using other languages shall be agreed upon in advance.

4.2.3 SI-units (the International System of Units) shall be used unless otherwise agreed.

4.2.4 Symbols shall be explained, or reference to a standard shall be given.

4.2.5 Any revision of documents shall be marked to identify the revised parts.

4.2.6 Unique revision numbers shall be allocated to all issues of a document, including the first issue. For documents with multiple sheets, the revision number should be the same for all sheets.

4.3 Organisation

4.3.1 The documentation submitted shall cover the information requested through the documentation requirements and any information in excess should be avoided.

4.3.2 A document may cover more than one documentation requirement. A documentation requirement may be covered by more than one submitted document.

4.4 Digital documentation format

4.4.1 Digital documentation should be submitted in PDF format with suitable size. Other formats including three-dimensional models may be submitted upon acceptance from the Society. Documentation should be in monochrome (black and white) unless otherwise required or necessary for the readability. Full readability shall be ensured.

4.4.2 The builder/manufacture is responsible for supplying the Society's local surveyor with paper copy of the documentation if requested.

SECTION 7 EXEMPTION DOCUMENTS

1 Definition

A document that is:

- relating to and identifying a target
- validated and signed by the issuing organisation
- referring to at least one standard
- granting an exemption to one or more requirements of a standard.

Guidance note:

Exemption documents are also known as 'exemption certificates'.

---e-n-d---o-f---g-u-i-d-a-n-c-e---n-o-t-e---

2 Content

Exemption documents should include:

- exemption document number / unique identifier
- issuing organisation
- government or organisation authorising the issuing organisation to issue the exemption document
- name and signature of originator
- issue date
- target
- referred standard editions
- validity period
- exemptions.

CHANGES – HISTORIC

September 2023 edition

Changes September 2023

<i>Topic</i>	<i>Reference</i>	<i>Description</i>
Deliverable types	Sec.3	Changed section heading.
	Sec.3 [3.2.1]	Added definition of design certificates.
	Sec.3 [3.2.2]	Added definition of design declaration.
	Sec.3 [3.3.3]	Added definition of product design declaration.
	Sec.3 [3.4.1]	Updated definition of product certificate.
	Sec.3 [3.4.3]	Updated definition of product declaration.
	Sec.3 [3.5]	Added compliance document types targeting organisations.
	Sec.3 [3.6]	Added compliance document types targeting persons.
	Sec.3 [4.2.2]	Added definition of hull construction certificate.
	Sec.3 [5]	New subsection for other deliverables.
Documentation types	Sec.5 [2.3.20]	Updated E220 – Electrical system philosophy.
	Sec.5 [2.4]	Defined documentation types for discipline F – Information technology. 2 new documentation types and 3 documentation types moved from discipline I.
	Sec.5 [2.5.2]	Added G011 – Safety assessment.
	Sec.5 [2.5.5]	Updated definition of G040 – Fire control plan.
	Sec.5 [2.5.7]	Updated definition of G060 – Structural fire protection drawing.
	Sec.5 [2.5.23]	Added G210 – Wind chill study.
	Sec.5 [2.6.14]	Updated definition of H080 – Strength analysis.
	Sec.5 [2.6.18]	Updated definition of H085 – Fatigue analysis.
	Sec.5 [2.6.20]	Added H087 – Scantling calculations.
	Sec.5 [2.6.21]	Added H090 – Model test specification.
	Sec.5 [2.6.22]	Updated H090 – Model test report to H091.
	Sec.5 [2.7]	Changed I011, I031 and I071 to F011, F031 and F071.
	Sec.5 [2.12.2]	Updated definition of S011 – Piping and instrumentation diagram (P and ID).
	Sec.5 [2.12.25]	Added S180 – Energy efficiency existing ships index (EEXI) onboard management manual.
	Sec.5 [2.12.26]	Added S190 Energy efficiency existing ships index (EEXI) technical file.

Topic	Reference	Description
	Previous Sec.5 [2.14.47]	Deleted Z281 – Asset certificate.
	Previous Sec.5 [2.14.48]	Deleted Z282 – Product certificate.
	Previous Sec.5 [2.14.49]	Deleted Z283 – Type approval certificate.
	Sec.5 [2.15.2]	Added Z011 - Cable routing drawing.
	Sec.5 [2.15.3]	Added Z012 - Casualty threshold plan.
	Sec.5 [2.15.4]	Added Z013 - Safe area plan.
	Sec.5 [2.15.20]	Added Z140 - Risk-based inspection (RBI) analysis.
	Sec.5 [2.15.26]	Added Z165 – Training manual.
	Sec.5 [2.15.34]	Added Z230 – Plan.
	Sec.5 [2.15.35]	Added Z231 – Voyage plan.
	Sec.5 [2.15.36]	Added Z232 - Inspection programme.
	Sec.5 [2.15.37]	Added Z240 – Policy.
	Sec.5 [2.15.45]	Re-coded Ballast water management plan to Z257.
	Sec.5 [2.15.46]	Added Z258 – Vessel management procedure.
	Sec.5 [2.15.47]	Added Z259 – Organisation management procedure.
	Sec.5 [2.15.48]	Updated definition of Z260 - Report.
	Sec.5 [2.15.57]	Added Z269 – Audit report.
	Sec.5 [2.15.58]	Added Z270 – Service report.
	Sec.5 [2.15.59]	Added Z271 – Analysis report.
	Sec.5 [2.15.60]	Added Z272 – Survey report.
	Sec.5 [2.15.61]	Re-coded Record to Z280.
	Sec.5 [2.15.62]	Added Z281 – Maintenance record.
	Sec.5 [2.15.63]	Added Z282 – Inspection and test record.
	Sec.5 [2.15.64]	Added Z283 – Training record.
	Sec.5 [2.15.65]	Added Z284 – Calibration record.
	Sec.5 [2.15.66]	Added Z285 – Personnel record.
	Sec.5 [2.15.67]	Added Z290 – Organisation chart.
	Sec.5 [2.15.69]	Added Z310 – Statement of fact.
	Sec.5 [2.15.70]	Added Z320 – Register.
	Sec.5 [2.15.71]	Re-coded Document register to Z321.
	Sec.5 [2.15.72]	Added Z322 – Vessel personnel register.

Topic	Reference	Description
	Sec.5 [2.15.74]	Added Z350 – Publication.
Documentation requirement systematics	Sec.6 Table 1	Defined status 'EX - for examination'.

September 2021 edition

Changes September 2021

Topic	Reference	Description
Rebranding to DNV	All	This document has been revised due to the rebranding of DNV GL to DNV. The following have been updated: the company name, material and certificate designations, and references to other documents in the DNV portfolio. Some of the documents referred to may not yet have been rebranded. If so, please see the relevant DNV GL document. No technical content has been changed.

January 2021 edition

Changes January 2021

Topic	Reference	Description
Objective, scope and application	Sec.1	Revised objective, scope and application, so that the document applies to all types of services. Moved remaining text to other sections, mainly to Sec.2.
Service related terms	Sec.2	Moved definitions of service related terms from Sec.1 to Sec.2. Added 'assets' as a target group more general than vessel.
Compliance document types	Sec.3 [1]	Made section applicable for all types of targets. Revised definitions to cover all types of targets. Added new paragraph covering names and codes. Added new paragraph defining use of the compliance document types.
	Sec.3 [2]	Added new subsection, with types aligned with IACS Rec.75 rev.3.
	Sec.3 [3]	Made subsection applicable for all types of targets. Revised definition of product design and product related compliance document types.
	Sec.3 [4]	Added new section defining target and standard related compliance document types.
Content of compliance documents	Sec.4	Included requirements to content. All other text deleted.

<i>Topic</i>	<i>Reference</i>	<i>Description</i>
Documentation types	Sec.5 [2]	Added new documentation type for foundations. Added new documentation types for cyber security. Deleted types for stability and for hazardous materials. Revised names and/or definitions for stability, hazardous materials and safe return to port.
Documentation requirement systematics	Sec.6	Revised section and updated requirements to formatting of digital documents.
Exemption documents	Sec.7	Added new section, providing definition and requirements to content.

July 2019 edition
